About Idobro

Our world faces complex problems that require a paradigm shift in mind-set and action. There is a critical need to broad base participation and contribution if we are to accelerate the pace of development and "leave no one behind". New age solutions will be compelled to be future-ready and hence, consider eco-system wide consequences while being contextualised to local requirements. This approach calls for "everyone in" and action at three layers in society to create long term systemic change.

Idobro's end-to-end approach seeks to overcome systemic barriers, provide market-based solutions and forge alliances driven by shared values and activated at 3 levels in the eco-system:

1. **Citizenship :** Value-based programs for youth and Corporate employees
2. **Entrepreneurship :** Support WSG Entrepreneurs (WSGE) as beneficiaries and enablers
3. **Partnership :** Multi-stakeholder projects to leverage resources and scale development solutions for vulnerable groups and our environment.

Idobro's mission is "to measure and multiply the socio-environomic impact of women, social and green (WSG) initiatives through Citizenship, Entrepreneurship and Partnership."

In the past 15 years, Idobro has established itself as a resource centre for Research, Implementation, Stakeholder Relations and Evaluation. We apply the critical lens of Gender, Innovation, Finance and Technology (GIFT), for deeper insights into diversity, inclusion and sustainability issues. Our annual RISE Summit provides thought leadership to foster dialogue, build capabilities and facilitate collaborations for integrated development. The RISE Infinity Foundations (RIF) established in 2014, strengthens individuals and institutions for positive action and collective impact on the Sustainable Development Goals (SDGs).

Idobro has designed and developed a customised toolkit to scale, sustain and replicate WSG initiatives:

- The RISE Square - Landscaping and Mapping of challenges and capabilities;
- RISE Framework for strategy and design;
- I*5 Multiplier Process for execution;
- RISE Values and Principles for partnerships.

With a footprint in 7 countries and 24 states of India, our local and global experience in urban and rural settings, with online and offline tools for corporate and non-profit, government and academic initiatives has co-created a 360º knowledge platform. This has advanced advocacy, engagement and collaboration with long term outcomes and value to our communities, enterprise members, partners and associates reaching out to over a million lives.

Idobro Impact Assessment Capabilities

Idobro has conducted several impact assessments for projects spanning multiple domains, which include education, health, women empowerment etc on a pan India basis. We use a judicial combination of both quantitative and qualitative tools and techniques.

We also provide services like development of Theory of Change and development of log frames to strengthen and bolster the impact of the customer projects. Listed below are some of the frameworks and methodologies adopted for our projects:

1. OECD DAC Framework which defines six evaluation criteria – relevance, coherence, effectiveness, efficiency, impact and sustainability
2. KAP (Knowledge, Attitude and Practice)
3. MEAL **(**Monitoring, Evaluation, Accountability, and Learning,)

Deliverables

The primary outputs of the impact assessments include a final report which analyses the effectiveness of the program, the learnings gained, noting good practices and areas for improvement, and consolidated recommendations on the possibility for scaling up program activities, and increasing collaboration with other stakeholders to help sustain the projects in the communities in the future.

Relevant Experience

Key Client Overview

1. *Britannia Nutrition Foundation*

Objective	***Outcome***
❖ *To assess the impact of the BNF's CSR programs to reduce malnutrition in villages and to identify the intended and unintended impact created and learnings from these programs for replication and/or scaling up across 9 states in India.*	The impact assessment helped to understand the direct & indirect impact the program had on the beneficiaries in terms of their knowledge, attitude and perceptions on healthy eating and malnutrition. It also assisted in identifying key strategies such as scaling up of the program in areas, which required the activities on a major scale as opposed to exiting the villages where it was no longer required.
Idobro's Scope *Use a mixed approach of both quantitative and qualitative parameters like digital surveys for the end beneficiaries, Key Informant Interviews (KIIs) with relevant stakeholders and Focus Group Discussions (FGDs) in the communities across 9 locations in 9 different states of India. The various stakeholders include the program beneficiaries, program volunteers in villages and schools, ICDS, NRCs, PHCs, ASHA workers, Anganwadi workers, and school teachers/ principals.* *Over 1500 beneficiary surveys were conducted in 6 different languages based on the state.*	

2. *Gabriel Project, Mumbai*

Objective	***Outcome***
❖ *The project objective was providing the monitoring evaluation and learning (MEAL) consultancy for the Adivasi Lok Seva Kendra (ALK) (Tribal Community Services Center- Social Protection and Access to Rights and Services for Marginalized Tribal Communities Project) located in Mokhada, district of Palghar, state of Maharashtra*	The impact assessment helped to understand the direct & indirect impact the program had on the beneficiaries. The primary output of the assessment is the production of a Learning Report which will analyse the effectiveness of the ALK program, the learnings gained, noting good practices and areas for improvement, and consolidated recommendations on the possibility for scaling up program activities, and increasing
Idobro's Scope. *As part of this assignment, Idobro's scope included the data collection for the various surveys provided to the end beneficiaries and the analysis of the survey results. This*	

project was assessed under the OECD framework and also involved several interactions with all the concerned stakeholders in the communities. Hence several Key Informant Interviews (KIIs) and Focus Group Discussions (FGDs) were also conducted with the different stakehokders	the role of government grants and schemes to communities in the future.

3. *Kishore Musale Charitable Trust*

Objective ❖ *This project was to offer a complete set of consultancy for:* ○ *Documentation of their Theory of Change* ○ *Development of a log frame to help in data collection for monthly monitoring* ○ *Recommendations on the current assessment methods for their interventions* ○ *Impact assessment of 3 specific projects: 1) Family Life Education 2) Soft Skills Education 3) English Speaking program.* ○ *Recommendations for improvement of all the interventions currently active in Palghar*	***Outcome*** The impact assessment helped to understand the direct & indirect impact the program had on the beneficiaries. The findings of the assessment provided the data to upgrade and drop a few lessons for the soft skills and English sepaling projects. A TOC along with an appropriate logframe for he monthly metrics to be captured was also created, which has made the reporting of the impact of the programs to senior management very simple. The communities have also been benefited by recommendations provided as part of the findings of the project.
Idobro's Scope *Use a mixed approach of both quantitative and qualitative parameters like digital surveys for the end beneficiaries, Key Informant Interviews (KIIs) with relevant stakeholders and Focus Group Discussions (FGDs) in the communities across all the 24 villages. KAP focused design was used for the assessment of the Family Life and Soft Skills programs, while a Rubrics based methodology was used for grading the English language program.* *The survey tools were designed in a bi-lingual fashion.*	

4. *Sir Ness Wadia Foundation, Mumbai*

Objective ❖ *This project was to conduct a situational analysis of the impact on the end beneficiaries of the SNWF CSR projects in the villages of Dahanu district,*	***Outcome*** The impact assessment helped to understand the impact the program had on the end beneficiaries with

Maharashtra. The programs were needed to be assessed with regards to health and nutrition, training and development, water resource development and improving livelihood scenarios in the villages.	regards to their health, children's education, employment opportunities and assistance to people with disabilities (PWDs)
Idobro's Scope *Use a mixed approach of both quantitative and qualitative parameters like digital surveys for the end beneficiaries, Key Informant Interviews (KIIs) with relevant stakeholders and Focus Group Discussions (FGDs) in the communities across 9 locations in 9 different states of India. The various stakeholders includes the program end beneficiaries, doctors and nurses involved in health camps conducted under the programs, farmer groups, (KVK) Krishi Vidyalay officials, school principals and teachers, Anganwadi workers, etc.*	

5. *Tata Capital Financial Services Ltd.*

Objective *To understand the impact the Education & Health program was having on the lives of the school students in Jalpaiguri, West Bengal and recommendations to scale it up.*	***Outcome*** The study helped understand the direct & indirect impact the program had on the beneficiaries and also assisted in identifying key strategies such as partnerships with the local administration and partner associations and other value addition to increase the program impact leading a Needs assessment study in 19 Sick tea gardens for scaling up the program which identified the needs associated with education such as nutrition in schools, availability of learning material, home visits, availability of water and sufficient staff.
Idobro's Scope *Use a mixed approach of both quantitative and qualitative parameters in close interaction with the beneficiaries and the other stakeholders such as teachers, principals, garden management, security forces, health workers associated with the Education & Health Program spread across 6 sick tea gardens consisting of over 25 schools & associated PHS's and further derive* learning's *to further scale it up – followed by a Needs Assessment in 19 sick tea gardens specifically focusing on education in over 65 schools and over 160 anganwadi's.*	

6. *Godrej Group*

Objective	***Outcome***
To undertake a community perception analysis in Maharashtra and Haridwar	The analysis assisted in understating the difference between the group's perception and that of the community on the various CSR programs and its intended benefits. Key focus areas were identified & interventions were improved based on inputs from community interactions. Needs identified were incorporated into the program design to provide a holistic solution. The perception analysis was undertaken over a period of 3 years to understand the changing perception with regards to the company's activities, the learnings from which were again fed into the overall program strategy
Idobro's Scope *Gain insights into the perception of the community around the plant locations through close interaction with the community using semi structured interviews and FGD's along with indicators based on the csr programs.* *Baseline and Needs assessment of educational, health and environmental parameters for villages in shirwal, Maharashtra and Roorkee, Himachal Pradesh* across 4 years	

7. *Kotak Education Foundation*

Objective	***Outcome***
To assess the change brought about by the School Leadership Development Intervention (SLDI) through in-depth interaction and interviews with over 100 school headmasters	The study assisted in understanding how the HM's had understood and adopted the practices covered under the program in their own schools and personal life. It also was able to identify key areas which needed further improvement and focus to strengthen the intervention
Idobro's Scope *As part of this project, Idobro was responsible for the following;* *-Interviewing the school headmasters on the various practices of the SDLI program* *-Documentation and analysis of the interviews* *-Intra-school Analysis of the performance of the primary and secondary head masters* *-Inter-school analysis of the headmaster's performances who are in the same year of the intervention* *-Provide recommendations to the facilitators on the course contents based on the responses and assessment of the headmaster responses*	

8. *Magic Bus Foundation India*

Objective	***Outcome***
To understand the impact the Life Skills program was having on the lives of the school students in Delhi & Maharashtra & a market need for a skill development program in Maharashtra and Hyderabad	The study assisted in identifying the direct behavioral changes brought about in the lives of the target audience i.e. the children and their families and feedback to enhance the program
Idobro's Scope	The Market research aided in establishing the need for the training program and possible entrepreneurship opportunities present in each area
Impact Evaluation of the Life Skills Program in Delhi & Maharashtra followed with a market research for a skill development program in Maharashtra and Hyderabad
